

REMARKS

Applicant filed this patent application under 35 U.S.C. § 371 in September 2005. No Office Action Communication has been issued in this case. Applicant respectfully request this Preliminary Amendment be entered. More specifically, Applicant has amended the Specification at page 10, starting at line 22 wherein the present paragraph has been amended to include the phrase "as illustrated by the element 24A in Fig. 2". No new matter has been added, please see original Fig. 2.

Additionally, Applicant submits a replacement sheet for Fig. 2. The original Fig. 2 showed the PBR 66 in a solid line. Fig. 2 now correctly shows part of the PBR in broken lines, which is consistent with the Specification.

Accordingly, Applicant respectfully request that the Specification be amended as previously described. Additionally, Applicant respectfully request that the Replacement Sheet for Fig. 2 be entered. If the Patent Office has any questions or concerns regarding this Preliminary Amendment, the Patent Office is kindly requested to contact the undersigned.

Respectfully submitted,
